

# MYTHICS™ DATA ANALYZER

ORACLE® CERTIFIED ADVANTAGE  
PARTNER

## LEVERAGE ORACLE APPLICATION EXPRESS RUNNING MYTHICS DATA ANALYZER (MDA)

UNLOCK THE VALUE OF YOUR  
ORACLE INVESTMENT

## YOUR CHALLENGE

School districts, universities, state & local agencies and many commercial organizations are being buried in mountains of data. The market is full of solutions for solving the most complex problems with unlimited budgets, while smaller organizations are saddled with shrinking IT budgets, forcing them to go without the efficient and proper reporting they require.

## OUR SOLUTION

Mythics has developed a web-enabled reporting solution that allows non-technical users to create powerful reports, alerts, and dashboards, as well as run or schedule complex parameter driven reports against data from nearly any source.

MDA leverages Oracle Application Express, an included feature of the Oracle Database that can be deployed to any customer that currently owns an Oracle Database. This approach to reporting is 100% supported by Oracle and lowers your total cost of ownership by empowering you to manage your own reports without a costly and complex software investment or sustained consulting requirement. For customers who do not own Oracle, Mythics makes it easy by including a full use license of the necessary Oracle components with the MDA software bundle.

MDA was specifically built to address the challenges of smaller organizations by providing a low-cost reporting tool that can work with traditional and non-traditional data sources.

## SECURITY, FLEXIBILITY AND CONTROL

With many reporting solutions, security policies are difficult to maintain. Security within the Mythics solution is both powerful and easy to use. Administrators define which capabilities a user has within the reporting tool, which data sets a user can view, which fields within a data set that a user can access, and can even impose record level access controls for a user accessing a data set – all with a few mouse clicks.

## REPORTING AND ANALYTICS

MYTHICS DATA ANALYZER IS AN AFFORDABLE, COMPREHENSIVE ENTERPRISE REPORTING AND ANALYTICS SOLUTION

### PRODUCT DESCRIPTION

MDA allows technical and non-technical users to create powerful reports, alerts, and dashboards from nearly any data source.

### PRODUCT FEATURES

- Build, view, and analyze data in an easy to use web-enabled format.
- Create ad-hoc reports, including: tabular reports, pie/bar/line charts, maps & pivot tables.
- Create spotlight reporting and alerting, allowing easy review of goal oriented analysis (i.e. KPIs).
- Build interactive dashboards that group together related reports for ease of display and deep analysis.
- Easily export HTML web reports to raw XLS data, as well as formatted XLS, PDF and RTF (Word) documents.
- Access and report from nearly any data source including Oracle and Non-Oracle Databases, delimited or XML formatted text files, web services, URLs & stored procedures.

### PRODUCT BENEFITS

- Ease of Use - Meet internal and external reporting needs via a simple-to-use interface.
- Low TCO - Affordable analytics and reporting with a low Total Cost of Ownership, relative to other reporting & business intelligence packages.
- Better Analysis - Delivers a secure centralized area where reliable reports can be built, analyzed and distributed

# MYTHICS™ DATA ANALYZER

**ORACLE®** CERTIFIED ADVANTAGE PARTNER

## A COMPREHENSIVE SOLUTION

MDA bundled with Mythics Professional Services consulting delivers a comprehensive solution tailored to your specific needs. This bundle includes:

- Analysis and planning to understand the customer's reporting needs across the organization.
- Installation and configuration of the reporting solution.
- The creation of a defined number of data sets (for ad-hoc reporting, alerts and dashboards), and a defined number of canned reports.
- Administration and end-user training.
- On-going support of the solution including: tool upgrades, patches, technical support, and remote support services for customization of the solution.

MDA is a complete solution, enabling Oracle customers to unlock the value of their existing investment. The reporting tool helps facilitate reporting and analysis from virtually any data source, making it available in the appropriate format and delivered exactly where and how you need it. Help your organization make better business decisions by leveraging the technology you already own with the MDA.
