FICAM Overview

Introduction

The Federal Government today faces serious security challenges extending from the threat of data breaches, identity theft, and inconsistent trust relationships. The need for effective cyber security is at an all-time high. **Emergent Consulting** will guide your agency in evaluating business processes and technical capabilities against the ICAM segment architecture, collaborate with you to define a strategic **Federal Identity, Credentialing and Access Management (FICAM)** roadmap, and assist you with its execution. The focus of our hands-on, experienced team is to enable agencies to streamline their existing ICAM processes, improve security and privacy protection, and lower cost. The Emergent Consulting FICAM offerings address security threats and reduce the complexity of implementing the FICAM architecture by solving the challenges faced by the public sector.

Furthermore, Emergent Consulting meets and works to exceed the expectations of the Federal policy requirements. Emergent is qualified for **GSA SIN 132-62 (End-to-end)** HSPD-12 Product and Service Components, and is in the process of obtaining qualifications for SINs 132-60 (A-F) and SIN 132-61.

Conclusion

The Emergent Consulting FICAM implementation will provide your Agency with the right solution to achieve their target ICAM architecture, as required by the OMB Policy Memo M11-11. Emergent Consulting ensures the right amount of people, processes and technology to deliver the right FICAM solution for your Agency. Problem Solved.

Emergent Consulting FICAM Solution

- **PMO** — Certified Project Management Professionals to augment client's PMO and drive the program forward
- **Assessment** — Audit and assessment services to baseline client's current ICAM state and identity next steps
- **Strategic Roadmap** — Identify target ICAM state and a realizable roadmap to get there
