## RSA Safe Switch Program

VIP  
Planning

VIP Pilot  
Implementation

VIP Production  
Implementation

**Production  
Transition**

**Emergent Consulting** offers a complete Safe Switch Program that is designed to safely migrate your enterprise from RSA to Symantec VIP two-factor authentication (2FA). The Symantec VeriSign® Identity Protection (VIP) service provides options and features that can bring dramatic improvement to the costs associated with building and maintaining an in-premise infrastructure. Through its cloud-based authentication service, VIP protects networks, applications and data against unauthorized access. In order for your enterprise to move to this secure, cloud-based system, you must subscribe to the Symantec VIP service, which provides the ability to use your VIP credentials with other VIP partners such as eBay and PayPal.

**The Safe Switch Program from Emergent Consulting** is a customized migration program designed to provide the right methodology and expertise for your enterprise. This customizable program offers your enterprise our expertise and services in:

#### Presales activities

- Identify the number of VIP integration points
- Determine if VIP Pilot will be installed in a production or a test environment
- Establish a high level transition schedule
- Provide an overview of VIP functionality
- Address any concerns or barriers to success

#### Licensing

- Identify the size of the user community
- Identify the types of tokens desired and define the pricing of any physical tokens required
- Provide a firm price quote based on the length of service contract desired
- Establish the VIP account with Symantec
- Coordinate shipment of any physical tokens

#### Consulting services

- Meet with stakeholders to provide an understanding of VIP
- Identify the specific integration points
- Create an implementation plan
- Install and Deploy VIP in the customer environment with a limited pilot group
- Finalize the VIP production rollout plan
- Identify and address any areas of concern

Emergent Consulting will partner with your organization to remove the fear and uncertainty of migrating from SecurID to VIP. Emergent Consulting is a Symantec Gold Partner – ensuring the right amount of people, processes and technology to deliver the right VIP program for your enterprise.

#### Emergent Consulting Transition to VIP

With this service, our clients will receive a customizable migration program for their Symantec VIP needs.

Emergent Consulting will provide clients with a superior level of expertise in Symantec VIP planning, implementation, migration and operations.

Each Emergent Consulting engagement is designed to meet your infrastructure needs.
